

MICHA DEN HEIJER

ABOUT ME

Hey, I'm Micha den Heijer. I've just completed Dutch High School and I'll be attending VU University Amsterdam soon!

I've always been intrested in programming and software development and I hope to learn more this summer!

More information about me can be found at my personal website (michadenheijer.com).

WORK EXPERIENCE

SEPTEMBER 2018 / JANUARY 2020

Software Developer / CISSTM

With a group of a few other students we participated in a CanSat competition. The goal of this competition is to build a small satellite (the size of a regular soda can). In these two years we've build a small satellite that can triangulate an small object.

Our source code is actually available on [GitHub](#).

AUGUST 2019 / CURRENT

Blogger / Prgrmmr

I've build my own website that is about programming and technology. Most of this information is already available in English, but it wasn't available in my native language (Dutch), so I decided to help Dutch people get into technology and programming.

EDUCATION

SEPTEMBER 2014 - JUNE 2020

Pre-university education

/HERBERT VISSERS COLLEGE

I'll graduate from the Herbert Vissers College at the Gymnasium level this June. Gymnasium is a specific type of Dutch secondary education, comparable to British grammar schools or American college-prepatory schools.

 Graduated

SEPTEMBER 2020 - JULY 2023

Econometrics and Operations Research

/VU UNIVERSITY

After the summer vacation I'll be attending VU University Amsterdam. I'll start studying Econometrics (which is a combination of Mathematics, Economics and Computer Science), I'm really looking forward to it!
